Serving A Most Progressive People In The Most Prosperous District In Central Alberta

VOL. 8, NO. 30

MIRROR, ALTA., MAY 18, 1922

\$2.00 PER YEAR

## JUST ARRIVED FOR THE WARMER WEATHER

### COTTON CREPE

This kind of Crepe for several years has been off the market, and we have just received them in beautiful floral and Butterfly Designs. They can be made up either for Dresses or Kimonos. Cannot be excelled in Price or Quality.

### HOMESPUNS

The very latest in Ladies' Sport Skirts and Suits. In Skirt Lengths or by the yard. Just come in and look these over.

### ZEPHRENE WOOLS

Summer weight for Scarfs or Sweaters on display in colours of: Beauty Caramel, Gendarine, Pink, Dafft, Geranium, Black and White.

### GENTS' HATS

Spring Styles, for the most particular Dresser. You cannot better yourself in Price and Quality. We have them in colours of Pearl Grey, Haze in Brown, Dark slate and Black. Also Tweed Hats in Brown, Dark slate and Heather.

### CHILDREN'S RAH RAH HATS

Get them while the getting is good. They come in different colours.

### MEN'S JERSEYS

Just the thing for evening knock-about. All Wool, open or closed neck. Good assortment to choose from in Emerald, Heather, Brown, Rose and Fawn.

### GROCERIES

We handle only the best of everything. All orders given the best of attention whether large or small.

### FOR SATISFACTION TRY

## McNair Bros.

Stores at Mirror and Bashaw

### READ the ADVERTISEMENTS

## Formaldehyde

**28c lb.**

New stock brought forward in a heated car

See us for your requirements

### OIL CLOTH

In squares 7 x 9, 9 x 10 1/2, and 9 x 12 feet. Also LINOLEUM by the yard at \$1.25 yd. See us for prices on RUGS

### HARNESS

Let us quote you on our "Cash with the Order" in this line. You will benefit about 10 per cent. Harness is of the best.

### SEEDS

Our stock of Ferry 1922 Seed is on display. Your inspection invited.

### WALL PAPER

See what we have to show in New and Old Samples. Now is the time to order.

### SPECIAL IN WASHING MACHINES

2 only, Gem Washing Machines, regular \$25.00, for \$21.00

## WATCH FOR THE GRASSHOPPERS

The grasshopper menace is one that may have to faced by the citizens of the district for very long if the report is true that grasshopper eggs have been found near Slavey. Mr. Forch, councillor for division 4 in Lamerton Municipal District, reported on Wednesday that the plague had made its appearance there, and plans for the extermination of the pest is already under way. In connection with the campaign against the grasshopper invasion, a meeting of unusual interest and importance to the district was called by R. O. Geraghty, organizer on Central Alberta No. 21, held at Slavey hall, in the town hall, Stettler.

The municipal districts with in the above area were represented by the following members of the district council: Waverley M.D. No. 367, P. Clark; Dublin M.D. No. 366, E. Cantor; Lamerton M.D. No. 308, Mr. E. Merrifield; Lakeside M.D. No. 367, Mrs. Haig M. D. No. 306, Mr. Whitehorn, and Watertown M.D. No. 129, Mr. Jenkins. E. H. Strickland, Government Entomologist; O. Geraghty, organizer, R. A. Gulliver and C. L. Willis were also present.

The meeting opened with a round table discussion as to the various difficulties in municipalities after which Mr. Strickland gave an account of the steady movement north of the "Roundside Grasshopper." He clearly delineated the menace this pest posed to the people of the country and chiefly the farmers would suffer unless control measures are immediately taken to destroy the young insects as soon as possible. A great number of questions were asked and Mr. Strickland gave a clear and definite answer to all. The municipal districts within Control Area No. 21 then organized to fight the grasshopper menace under the direction of R. O. Geraghty.

In answer to questions Mr. Strickland advised the following quantities of ingredients be ordered to begin with by each M. D.: "One sawdust, 1 ton bran, 100 lbs. molasses, 100 lbs. salt; 200 lbs. arsenic."

It was suggested that each councillor take active measures in his district to put out the disease in ignorance the seriousness of the grasshopper pest, and to take action by putting out the bait while the grasshoppers are not yet hatched.

Just note that our traps are there. Look for traps in the sod now. They somewhat resemble small narrow grains of wheat. If you find them in large numbers, report them at once to your municipal councilor. Write to the secretary of the municipal district, or to the nearest School of Agriculture, for complete directions. Kill them with poison bait before they spread into grain fields and destroy the crops.

Geo. Rennie, of Lamerton, a member of the council, stated that a mixing plant is to be located at Alist and any farmer can obtain a supply of the poison bait free of charge.

A number of changes in the color of Canadian postage stamps are being made to conform with the new international regulations. A straw-colored one-cent stamp is being issued to replace the old green one. It will be white and hard to use many years. As the various post offices exhaust their supply of green stamps, they will be replaced with the new issue. The red two-cent stamp is being replaced by a green stamp, and should a six-cent stamp ever be issued, it will take the red color without distinguishing the two-cent stamp. The five-cent stamp is of a violet shade, while the ten cent stamp is blue.

## LOCAL AND DISTRICT NEWS

Wind, Wind, Wind.  
House to rent. Apply to E. E. Estell, Mirror.

The ice on Buffalo lake disappeared completely last Monday. The store of the Devereaux Drug Co. received a cast of the bridge.

Mrs. Swinton Smith, of Calgary, was the guest of Mrs. W. G. Walker over the week end.

Stettler ball team plays Miramichi on the local diamond on Sunday afternoon next at 4:15. H. McLean is away on a two weeks holiday at lethbridge.

Mrs. Harry Mitchell, of Edmonton, is visiting with relatives and friends in Mirror and district.

Mrs. Geo. Jackson and daughter, Miss Bertie, left Thursday of last week on a visit to North Dakota.

Nature intended that you can do what you want. You can do it if you take Taubie, J. N. Devereux.

S. J. Mills, who was in the district for the past ten months, left Saturday for his home in London, England.

Rev. J. E. Collins is attending the Camrose District Synod of the Methodist church at Camrose this week (Thursday).

There will be a dance in the Grand theatre on Friday evening, May 20th. Bullock's 3-piece orchestra will furnish the music.

Wednesday of next week is the 24th of May. The post office and telephone office will be closed during the usual holiday hours.

REAL house for sale, brand new, warm and snug, moveable, only \$125. Also a three-burner oil stove and a heater. Apply PRINCIPAL SCHOOL HOUSE.

The regular meeting of the Women's Auxiliary of St. Monica's church will be held on Thursday afternoon, May 25th at the home of Mrs. C. E. Smith.

From coast to coast Taubie is known and honored and millions have taken it and pronounced it the greatest medicine of all times. N. J. Devereux.

A. J. Jewell is able to be again engaged after a siege of lameness. Just now he is tending to work in the blacksmith shop during Mr. Jewell's absence.

Mrs. Margaret McLean left on Friday of last week for lethbridge, where she is taking part in the Musical Festival which is being conducted there this week.

Mr. and Mrs. C. G. Stewart and family left Saturday for Vena, Sask. Mr. Stewart has been acting as agent for the Security Elevator here for the past season.

Geo. Low returned to his duties as G. T. P. engineer last Friday. He had been absent in health. Mr. Low spent a part of the past six months in the hospital at Rochester, Minn., and later, visited in Ontario.

A. J. McLean, who has been employed as blacksmith at the G. T. P. roundhouse, here for a number of years, left on Friday of last week to extend his stay at Ottawa, Ont., and his home at Sydney, N. S.

"I have sold over 2,000 bottles of Tablas and have never had a dissatisfied customer," writes Smiser's Drug Store, Columbia, Tenn. N. J. Devereux.

A. S. Loomer is visiting with Mr. and Mrs. L. G. Fisher. Mr. Loomer has been publishing a paper at Cartstays, Alta., and sold out recently. Mr. and Mrs. Loomer will leave on Friday next to take up their residence at the Coast.

## Fireworks FOR 24th OF MAY

We have a good assortment of Firecrackers, Rockets, Candles, Etc.

Get your Boy a JAZZ CAP, .30c each

### RUBBER BALLS

## Freight Rates And Business

A special committee of the House of Commons has been appointed to study the whole question of freight rates with a view to bringing about a reduction in the existing high schedule, which, it is generally agreed, is having a detrimental effect on business, is operating a practical revival in industrial activity, and is responsible for Western agricultural prosperity.

The problem of reducing rates in the face of an annual amount of millions of dollars in the operation of the National Railways is admittedly a difficult one. The National Railways badly need every dollar of revenue they can get, and a substantial reduction in freight charges may prove a very serious loss to them. Yet there is less than a substantial cut will be quite ineffective in providing a much-needed stimulus to business and an appropriate aid to the farmers of the country.

There is, however, much force in the argument that a lowering in the carrying charges of the railways will not necessarily mean a reduction in net revenue. On the contrary, it is the general opinion of experts that the result would be an increase in revenue. Present rates are probably close to the line where they amount to actual prohibition of traffic, and a reduction of rates has the effect of stimulating business and thereby increasing traffic; the earnings of the railways may easily record increases rather than the mere reduction of rates.

Support to this view is found in a comparative study of the figures of revenue and expenditure of Canadian railways for the years 1920 and 1921. Freight rates were increased in September, 1920, and partly reduced in January, 1921, and in December, 1921. If the arguments of those opposed to rate reductions are correct, the result of the rate cut should have been greater in 1921 than in 1920. Yet the result was the same. The deficit on the old Canadian Northern system was nearly \$10,000,000 less in 1921 than in the previous year, the deficit on what are known as the Canadian Government Railways, the Grand Trunk, the Intercolonial, was almost cut in two, being reduced from \$12,000,000 in 1920 to \$6,000,000 in 1921.

These three roads between them showed a deficit in operation for 1921 of something over \$16,000,000, where in 1920 the total was over \$37,000,000. The operating profit of the old Grand Trunk was increased and so, too, was that of the Canadian Northern.

Other factors, however, have been, and undoubtedly were, other factors contributing to the betterments shown. Nevertheless, the figures would seem to point to the conclusion that rate reductions were not in themselves disastrous, but that, on the contrary, they proved beneficial and were contributing factors in bringing about a marked improvement in business.

As far as the railways are concerned, it is argued that substantial rate reductions will result in an increase in the operating deficit of the Canadian National Railways, the question arises whether it would not be better to face that possibility and meet the loss out of general taxation for a year or two if, through such reduction in rates, there was marked encouragement given to agriculture, industry, and commerce throughout the Dominion, with a consequent lessening in unemployment and increased buying power by the people and some return of prosperity.

The present deficit on the Canadian National Railways is a heavy one and constitutes a very real burden for Canadian taxpayers. It is almost impossible for the railroads to turn back to a period of high taxation and business depression, they have not the money. No matter how light taxes may be people cannot pay them without money and in the absence of means of earning money. But with a return of business activity and more employment the people would be able to meet their tax bills even somewhat heavier taxes, and to turn back to a period of larger railway earnings.

The railways are one of the chief agencies in the upbuilding of trade and commerce, and if their rates are maintained at a level so high as to restrict traffic, they are not benefiting either themselves or the people and country they were created to serve, but are, as a matter of fact, killing the goose that lays the golden eggs.

The experiment of enforcing a substantial reduction in freight rates as a means of reviving business throughout Canada, and giving some much-needed encouragement to agricultural production, may well be tried at this time.

## Farmer Premiers

**Five of the Provincial Premiers Are Farmers by Occupation**

When the Premier of Manitoba makes the point that he is a farmer, he calls attention to the fact that farmers are the backbone of the economy in Canada. Leaders of the Ontario and Alberta Governments are farmers both politically and by occupation. The Premiers of Manitoba and British Columbia are in politics and by occupation. The Premier of Saskatchewan is a farmer in politics and is down in the Parliamentary Guide as a farmer by occupation. This accounts for five of the nine provincial premiers. Three of the others are lawyers, and the fourth a merchant—Vancouver, Prince

Island has built a great arch, 60 feet high, overlooking Tokyo, to commemorate those who died during the war in the service of the empire.

## Japan Buying Lumber

**Japan Government Buys Production of Lumber from Native Forests**

According to Mr. J. S. Slaton, of Koho, who arrived in Victoria with a party of Japanese lumber and pulpwood buyers, said to represent \$25,000,000, lumber accounted for \$82,750,290; animal slaughtered, \$17,290,000; dairy products, \$25,000,000; general \$20,000,000; garage tires, etc., \$1,000,000; and agricultural products, \$8,170,000; and horticultural products and sugar beet, \$1,000,000.

Worms are encouraged by morbid conditions of the stomach and bowels, and so sublist. Miller's Worm Powders are taken immediately and will sweep the worms away. No destructive parasite can live in contact with the intestinal walls. Miller's Worm Powder is a wonderful worm destroyer, but a healing medicine most beneficial to the human constitution.

Cherries Lead in Batteria

A scientist has succeeded in calculating the number of bacteria in certain fruits. He found 3,000,000 in half a pound of gooseberries, 8,000,000 in a half a pound of grapes, and 12,000,000 in half a pound of cherries—Cleveland Plain Dealer.

## Overcrowded Britain

An eminent surgeon reminded me the other day that in spite of the war the population of Britain has increased by 2,000,000 during the last decade. He asked me whether I thought the country could support them all, and I replied in the negative, summing up that emigration is the only remedy. The trouble is that our surplus is among townpeople and not the rural workers needed by new countries—London Sunday Pictorial.

## A NERVOUS BREAKDOWN

When the Blood is Out of Order the Nerves Are Starved

The nerve system is the governing system of the body. Heart, lungs, digestion and brain: these are not normal unless nerves are disturbed and cause disease. The first stage of nervous debility are not always apparent to the patient, while the victim seems to be oppressed by their nerves. The master of the body is the blood, and nothing but suitable treatment will prevent a breakdown. The victim, who has been overtaken by severe nervous disorders may be relieved by improving the condition of the blood. Dr. William Pink Pills enrich the blood that this medicine has proved beneficial in many cases. It is the blood that carries the oxygen to the nerves. The action on the heller blood made by these pills, the appetite improves, indigestion disappears, the heart becomes strong, the nerves calmed, the nervousness disappears, the sleep is sound, the mind clear, the memory good. The victim takes a few of these pills daily and the nervousness disappears.

Dr. William Pink Pills, \$2.50 per bottle.

# Reply Of Russia Considered As Basis For Further Negotiations

GEOGRAPHY—Russia's reply to the Allied memorandum, which was presented to Signor Schanzer, president of the economic conference, is generally regarded as confidential. At least it is considered a basis for further negotiations.

Its suggestion that all the tangled financial problems be submitted to an international committee of experts headed by the Economic Conference provides a means of escape from the present overheated atmosphere, which appears to be unfavorable for the settlement of the property question, which Great Britain and lesser powers will sponsor.

France expresses great disappointment at the reply and Britain is far from satisfied. M. Barthou, head of the French delegation, has written an explanation of the fact that the response did not get anywhere and was not really an answer to all of the Allied proposals. Consequently, it will not be certain until after the conference is over.

In Paris whether the Russian proposals will be accepted by the French as a basis for continuation of the discussion.

In the meantime the nature of the conference is highly uncertain. Some of the delegates believe it will close precipitately, or perhaps it would be truer to say that they hope it will. Other delegates predict that it will last for some time and drag into the Russian financial tangle in great detail. The latter seem to be in the majority and indications are that the conference may be prolonged indefinitely.

## Baltic "Entente" Formed

Alliance Said to be "Cornerstone for Europe's Peace"

Riga, Latvia.—The Baltic "Entente" formed by Poland, Estonia, Latvia and Finland in a convention held at Warsaw in March is headed by the Baltic states. The cornerstone of peace for this part of Europe is agreed.

Representatives of the four countries mutually agreed that all conflicts and disputes between them must be settled in an amicable manner only.

All important questions upon which the four may be unable to agree are to be referred to a court of arbitration in accordance with the rules of the League of Nations.

Each of the four contracting States is obligated in future to inform the others of its ratification of the texts of agreements concluded by that State with any other nation.

The convention is to hold good for five years and to be automatically renewed for another five years unless a six-months' notice of its abrogation is given. It is said in diplomatic circles that Lithuania may join the Baltic Entente later.

By making your purchases from your home merchant, you are contributing direct to the prosperity of the community in which you live.

## Alberta's Natural Resources Question

EDMONTON.—Alberta's campaign for the recovery and control of its natural resources will be continued, according to a statement made at one of the Economic Council of Provincial Government, with the chances in favor of this province having to seek terms on a somewhat different basis from the other provinces. The position is that the situation is different in Alberta from that in either Saskatchewan or Manitoba, where the situation is almost identical, the question of the sale of seeds wide, the river has overflowed its banks at Iverill, Iverill, living in this district, are leaving their homes and seeking shelter in the neighboring state of Montana, while the more enterprising have driven their cattle to the hills. The prairie crop estimated at \$800,000 has been washed away, 40 sections of settled land being inundated.

France expresses great disappointment at the reply and Britain is far from satisfied. M. Barthou, head of the French delegation, has written an explanation of the fact that the response did not get anywhere and was not really an answer to all of the Allied proposals. Consequently, it will not be certain until after the conference is over.

In Paris whether the Russian proposals will be accepted by the French as a basis for continuation of the discussion.

In the meantime the nature of the conference is highly uncertain. Some of the delegates believe it will close precipitately, or perhaps it would be truer to say that they hope it will. Other delegates predict that it will last for some time and drag into the Russian financial tangle in great detail. The latter seem to be in the majority and indications are that the conference may be prolonged indefinitely.

King Assumes Belgium of British Empire's Sympathy

BRUSSELS.—King Albert gave a banquet in the palace to King George and Queen Mary. In toasted his royal guests, the King said that Belgium still was suffering from the destruction and the economic troubles caused by the war. The king added that Belgium needs at the same time, reconstruction, more work and a number of simpler measures which had determined the policy Belgium had resolved to pursue in full agreement with her allies.

Replying, King George said if there was any thing certain in the uncertain epoch which the world was passing, it was that the difficulties of Belgium could rapidly be surmounted, thanks to the wisdom of the Belgian people and to the indomitable energy of the Belgian people. He added that in his progress towards the great future ahead of her Belgium always would have the sympathy of the British Empire, which fought beside her in the war.

## For Peace of Europe

Closing the Ranks Against Tyranny of Brute Force, Says Lloyd George

LONDON.—Premier Lloyd George has sent a formal telegram to the Congregational Union of England and Wales, in response to the Union's message to him assuring him of the Congregationalists' sympathy and support in his efforts to secure the peace of Europe.

"The humanitarian forces of the world are closing their ranks in the cause of peace," said the Premier. "The brute force, Germany, has cut us off from the rest of Europe. We shall not rest until we have won."

Premier Hopes Dente Report

LONDON.—Premier William Hughes, of the Australian Commonwealth, says Reuter's Melbourne correspondent, denies a newspaper statement that he favored cutting up West Australia into three states. He says there will be no time to talk of sub-division, when he gets many more people in Australia.

## Lord Northcliffe Says Embargo On Cattle An Insult To Canada

London.—Declaring that he was very glad that he declined to become a member of the Canadian Government of Great Britain, if only because he would not want to be one of those who helped to begin the end of the British Empire by losing the Canadian colonies, Lord Northcliffe devoted the greater part of an address at a luncheon of the Empire Press Union to condemning the "great slur we placed upon the people of Canada by the embargo on cattle." Lord Northcliffe is honorary treasurer of the Empire Press Union.

Lord Northcliffe said: "We are not watching Canada closely enough to know as to what is happening in the maritime provinces. One of the cleverest men I ever met, Lord Shaughnessy, said to me two years ago, 'I wonder if I can get into the Canadian cabinet.' I am afraid that the fate of our country is largely wrapped up in what happens in Alberta and Saskatchewan."

Continuing, Lord Northcliffe said: "I don't blame the British people for not giving attention to Canadian affairs. If we were leaving papers in New York—which God forbid!—should not give much attention to what is happening in Australia or New Zealand, every Canadian farmer."

## Floods Cause

### Immense Damage

Assiniboine River Overflows Banks and Ruins Crops

WINNIPEG.—Heavy rains have contributed to a further rise of the Assiniboine river and flooding dykes along its banks have been breached, and the water is now creeping over thousands of acres of seedless barley out of danger.

A fleet of flat boats has been put into operation in the Poplar Point area, and farmers are paddling to and fro from town, releasing many persons who had been marooned in the upper stories of their houses. The amount of seed of seeds lost is now under way there. Farmers in many districts are driving their cattle to the bush and removing their valuable to safe spots in the hills. A 12-mile stretch of the Assiniboine wide, the river has overflowed its banks at Iverill, Iverill, living in this district, are leaving their homes and seeking shelter in the neighboring state of Montana, while the more enterprising have driven their cattle to the hills. The prairie crop estimated at \$800,000 has been washed away, 40 sections of settled land being inundated.

King Assumes Belgium of British Empire's Sympathy

BRUSSELS.—King Albert gave a banquet in the palace to King George and Queen Mary. In toasting his royal guests, the King said that Belgium still was suffering from the destruction and the economic troubles caused by the war. The king added that Belgium needs at the same time, reconstruction, more work and a number of simpler measures which had determined the policy Belgium had resolved to pursue in full agreement with her allies.

Replying, King George said if there was any thing certain in the uncertain epoch which the world was passing, it was that the difficulties of Belgium could rapidly be surmounted, thanks to the wisdom of the Belgian people and to the indomitable energy of the Belgian people. He added that in his progress towards the great future ahead of her Belgium always would have the sympathy of the British Empire, which fought beside her in the war.

Bringing Big Sugar Shipment to Canada

Carrie of 6,000 Tons Largest Ever Shipped from Jamaica

KINGSTON, JAMAICA.—The Canadian steamer Montrose sailed yesterday with 6,000 tons of the largest cargo of sugar ever shipped from this island. To date Canada has purchased over 75 per cent of the sugar crop of Jamaica.

About a year ago Canada extended to Jamaica a customs preference similar to that granted to other portions of the British West Indies some years ago. During the first nine months of the Canadian preference, imports of coffee and coconuts, hickory, grapefruit, quadruplets, spiced hickory, skins doubled, while vegetable oils increased fourteen fold and raw sugar went up 40 per cent. About the same time the Jamaican Legislature ratified a measure granting a customs preference on Canadian products but the preference in most cases is only five per cent.

Increasing in Food Prices

Washington.—An upward trend in the retail cost of food was noted in statistics made public by the Bureau of Labor Statistics of the Department of Labor. Reports from 15 cities in the lower middle class of the country show that food prices in April 15, 1915, up to three percent, while only four reported decreases and only one of these, Fall River, with two per cent, showing more than one-half of one per cent decline.

Mr. B. C. Map For British Ambassador

Victoria.—Premier John Oliver sent a special map of British Columbia prepared by Major G. C. Bowles, head of the General Map Department, to Sir Auckland Geddes in Washington, British ambassador to the United States.

Sir Auckland was shown a few days ago with Lady Geddes to the premier that the

British was particularly interested in British Columbia, being the coast province of Canada on the Pacific.

He also showed the premier for Macmillan, who he could have the latest geographical data on this province for use in the embassy.

Financial Crisis in Canton

Government Bank Note Depreciated Fifty Per Cent.

Aug. 1.—The financial crisis in Canton, the seat of the Southern Government, is reported in despatches received here.

The banks are closed; business

is paralyzed and the Government bank note has depreciated

50 per cent in value.

The crisis is attributed

to the agitation caused by the operations of the Southern Government in preparation for its projected campaign against the north and the consequent political complications.

Lash for Persistent Criminals

TORONTO.—Automatic sentence of the lash to persistent criminals, which the grand jury at the spring assizes presented after completing their sessional duties.

Britain Still Hopes That Peace In Ireland May Be Restored

London.—The Government was

again sharply attacked in the House of Commons, failing to prevent the three British officers recently kidnapped in Ireland.

Austin Chamberlain, the Government leader, replying, repeated that General Sir Nevil Macready, the British commander in Ireland, had seen representatives of both parties but they had not assured him they were keeping quiet about the men although they were doing their utmost to ascertain the facts of the case.

Mr. Chamberlain admitted that a

grave issue was before the House.

The Government should decide

whether the experiment

had failed and if so what the

Government should do.

He believed that the power and

influence of the provisional govern-

ment were increasing and that,

given a little time, the Government

would be able to secure a mandate

from the Irish people and establish

its authority throughout the 26 counties.

"For heaven's sake," Mr. Chamberlain continued, "after the bitter ex-

perience of the past, let us give the

provisional government a chance.

We shall not save the lives of loyal subjects in Ireland by resuming what

we call civil war that could only

end in subsection, not in reconciliation."

The motion for adjournment on

which the debate was raised, was

defeated 253 to 61.

W. N. U. 1429

## Control Of Grasshoppers

Steps Which Should be Taken to Suppress the Pest

The grasshopper pest is again to be found in the prairie provinces and in many cases is spreading into new territory. Every precaution should be taken and farmers will be well advised to write for leaflet No. 1 issued by the Entomological Branch, Department of Agriculture, Ottawa, entitled "The Control of Grasshoppers," and act upon the suggestions therein contained, some of which are as follows:

Plant in interseeded fields before the middle of May not less than five inches deep and turn the furrows so that there is no overlapping edge.

After the hoppers have hatched, place a wire-mesh cage or tampon from the census leaving strings some 25 ft. wide into which the grasshoppers will be driven. Then poison with a mixture consisting of one part of bean and mustard oil and half a pint of water.

When the young hoppers are concentrated on the roadside soon after hatching, scatter dry straw over the grass and lay manure.

Efficient organization is an important part of the work of control.

Don't sow seed on stubble and that should be mowed down as soon as it has been merely dried or cuttings taken off. Don't let hay lie upon clean summer lawns or on newly ploughed land.

Adult grasshoppers are as easily baited by poison as the young, wet weather does not destroy the eggs.

Watch the roadides and addled areas in July and Aug. for hatching grounds.

The presence of grasshoppers is to the Dominion or Provincial Department of Agriculture.

A handkerchief over the nose and mouth when mixing the poison.

Keep cattle well supplied with salt, and when grazing, cleanse the pasture in which the poison has been mixed or from which it has been dispersed.

**Good Work of G.W.V.A.**

**G.W.V.A. Service Man at Lastard Receives  
Cheque Through Efforts of San-  
khalawan Association**

A cheque for \$1,000 in adjustment of a claim for subsistence allowances has just been received by Lastard Tamm, a service man, as amount of cooperative work done by the Regal, Prential and Dominion G.W.V.A. Com- mands.

Comrade Harry Griffin, President of the Lastard Command, writing to the Macmillan Secretary of the G.W.V.A., expresses his appreciation of the prompt manner in which the case was handled. He pointed out that the Macmillan committee had been unable to get his claim adjusted personally but could get no satisfaction. Comrade Griffin says: "I can assure you that the Provincial and Dominion Commands are to be congratulated for the excellent work they are carrying on in the wonderful work of the G.W.V.A. on behalf of ex-service men."

This claim originated owing to the fact that when Lastard Griffin, who was serving in this command when this case was serving, was wounded in September, 1918, the men were told to find their own billets, and informed that they would be allowed thirty-three dollars per month for subsistence. This instruction, before this Lastard com- mand could get his cheque, he was re-turned to Canada.

Falling to get satisfaction by his own efforts, he contacted his claim with the London Branch of the G.W.V.A., or which he is a member, with the result that the negotiations on his behalf have now ended successfully.

**Patriotic Man in America**

Recent discoveries in the caves of the Ohio Valley seem to give evidence that man existed in America in the glacial age. In two Kentucky caves, seven human bodies were identified as being of the glacial period, and bones of racoon, groundhog, bear, deer, buffalo and groundhog. The bear skeleton, partly fossilized, is supposed to be the remains of a polar bear that lived in the great ice age before the present geological era.

**Archies' Gift**

Mother—"Yes, my darling, those little boys next door have no father or mother, and I am glad. Archie, wouldn't you like to give them something?"

Archie (with great enthusiasm)—"Oh, yes, mamma. Let's give them some June."

It may seem paradoxical, but a man is down in the world when he has to live up in an attic.

There is one compensation for the man up a tree—he lives high.

W. N. U. 1920

## Dual Purpose Shorthorns.

Tests in Feeding, Especially as to the Relative Values of Corn and Sunflowers

Dual purpose cattle are in demand in Manitoba, writes the superintendent of the Dominion Experimental Farm at Brandon, who for years has devoted attention to raising this breed of cattle. He says in his report that a number of cattle, of both bulls and cows, have been sold to western farmers for use in the improvement of their herds, but it has not been possible to meet the demand for breeding stock of this type. The herd, it must be mentioned, has qualified for accreditation.

A three-year-old cow shows in a lactation period of 265 days, 7,582 lbs. of milk, 299.4 lbs. of fat, and 1,125.27 lbs. of protein.

A ten-year-old cow shows in 470 days, 5,652 lbs. of milk, 237.22 lbs. fat, 3.7 per cent, and a profit of \$30.61.

The cost of feed in the first instance was \$113.40, and in the second \$104.82.

Manitoba gives priority in the winter, consisting of ensilage made from corn or sunflowers, mixed with cut straw, twice a day, the grain ration being fed at the same time, or at noon when the cattle are turned out or at half hay, if available, was given.

Tests with seven milking cows have been conducted to ascertain the feeding value of sunflower ensilage compared with corn ensilage. The results show need being pure bred shorthorn of the dual purpose strain. The conclusion arrived at was that sunflowers do not produce quite as good ensilage as good corn, nor is it as good as grain, an average of 0.58 pound of milk per cow per day and of 1.66 pounds of bodily gain per day. A test was similarly made with fourteen heifers of the dual purpose strain and the results were similar to those with corn, but to a slightly less extent still, as the superintendent says, a gain of half a pound per day on growing heifers is a difference well worth noticing. The experiments also showed that it is possible that the superiority shown by corn is so much due to palatability as to nutritive value. The sunflowers proved more troublesome in regard to freezing in the silo than corn.

Experiments were also conducted at the farm in the cross-breeding and feeding of swine, in the raising of grade lambs, in the rotation of crops, on the economic value of various agricultural crops, in the cultivation of twenty-six varieties of vegetables, ten varieties of beans and varieties of other vegetables. In the growth of fruits and flowers, and in the sun production and the housing of poultry.

## Rothchild's Wit

Was Willing to Divide His Wealth Equally Among the Population

During the recent winter of 1918-19, a British peer had gathered round the house of the head of the house of Rothschild in Paris. Baron James opened the door, faced the crowd, and beckoned to his leader, who was his host, at once came forward. The visitor entered the Rothschild saloon.

"Gentlemen," said the Baron, "you desire, I understand, an equal division of what I have among others. You are right; I have a desire to sacrifice, to ensure justice, to divide among us all, working out a little sum."

The realizable value of my property amounts to—divide that total by the whole population of the world."

"That amounts exactly to so many sous per head. Allow me, gentlemen, to hand you your share of this sum and to wish you a very good evening!"

## Drill Wells for Settlers

Manitoba Government Carries on Good Work in Finding Water

The Manitoba provincial well-drilling department drilled 325 wells last year, of which 110 were successful, and 215 were dry. The department expects to drill 275 wells this year.

Settlers throughout the province,

and 45 returned soldiers took advantage of the opportunity to get water drilled for them.

The settler's experience of the department in finding water is placed at his disposal.

## Doctors Declare Music Heals

Music as a powerful healing agency for physical as well as mental malady was one of the principal topics of discussion at the annual meeting of the Tri-State Medical Association at St. Louis, Mo., recently. About 250 physicians and surgeons of Missouri, Arkansas and Tennessee heard this subject discussed. The physicians were enthusiastic in boasting music as a healer and classified it in certain maladies, as almost as efficacious as drugs.

It may seem paradoxical, but a man is down in the world when he has to live up in an attic.

There is one compensation for the man up a tree—he lives high.

## British Columbia a Field for Archaeologists

Cave Men Lived at Coast Province Until Very Recent Date

The stone age, which after making the cave man famous, came to an end in Western Europe about 1700 B.C., was carried on for more than three thousand years later and in some districts, as far east as British Columbia, up until as late as a century ago, in some districts, according to findings of archaeologists who have been exploring some of the old camp sites, hunting grounds and abandoned graves along the coast and in the interior of the provinces.

The stone age in British Columbia has for years been the study of scientific archaeologists, who have been working in the field in an effort to build up the story of the evolution of the prehistoric civilization, as exemplified in the tribes of human beings who were here long before the Indians between the Rockies and the Coast. Valuable collections have been obtained. It is only recently that British Columbia has, in an effective way, turned its attention to the past. Under Professor C. E. M. Bowles, archaeology has been partially rebuilt and the collection put on exhibition.

The aboriginal occupants of this country belong to the neolithic, or new stone age, according to the classification of the stone tools used from old villages and burial places. Stone and bone tools were in common use when the first white explorers reached the North Pacific, although iron and copper in small quantities were also used nearly everywhere.

In some instances the native races had developed a degree of art. One of the feature objects in the exhibit is a copy of a human figure seated holding a bow. It was made out of a solid block of stone and then polished off smoothly. There are two of these specimens very much alike. One was discovered near Dawson City, Yukon, and the other in Hazelton Bay, Nassau River, on Vancouver Island, North America.

Perhaps most characteristic of the stone age are the stone axes and hammers discovered in many places. They are almost identical with those found in Europe.

The stone weapons include daggers and war clubs. There are many examples of stone dices, hewn out of small boulders. What appears to be a spear point of obsidian, found near the village of Hazelton, British Columbia, is a fine example of a stone weapon.

Primitively man in British Columbia apparently did a little smelting once in a while. Old shell mounds on the Thompson and Fraser Rivers have given evidence of this.

The early explorers found that the native races were using a true tobacco, nicotine, atagnate which grows wild in the Thompson River country and was smoked along with grease and kinikinnick.

Perhaps the most characteristic of the stone age are the stone axes and hammers discovered in many places. They are almost identical with those found in Europe.

The stone weapons include daggers and war clubs. There are many examples of stone dices, hewn out of small boulders. What appears to be a spear point of obsidian, found near the village of Hazelton, British Columbia, is a fine example of a stone weapon.

Primitively man in British Columbia apparently did a little smelting once in a while. Old shell mounds on the Thompson and Fraser Rivers have given evidence of this.

The early explorers found that the native races were using a true tobacco, nicotine, atagnate which grows wild in the Thompson River country and was smoked along with grease and kinikinnick.

These are mere trifles, however, compared with the following:

It was asked if he could not get a grating to fit over the top of his house, so that a dog would be in one in the first, two in the second, four in the third, eight in the fourth and so on in succession. He gave the answer for the fourteenth (6,192), and the eighth (2,388) respectively, and the twenty-fourth (8,388,600) instantly, and he gave the figures for the forty-eighth box (140,737,520). The editor of the paper of which he is a member said he was surprised at the rapidity with which he got the figures.

Richard Myers, another association representative, argued for a revision of the scale of difficulties.

Buster Ships Made

Creameries in the province of Manitoba shipped out of the province during the year 1918, 103 carloads of creamery butter, representing 2,316,272 pounds, and at \$10.90 per pound, \$26,020. The price of this butter was paid to Montreal, Toronto and the British markets, a few cars going to Chicago and New York. A Government grade certificate was issued on each car.

The Baby's Chance

A doctor says it was eight times as dangerous during the war to be a baby in a cradle than to be a soldier in the trenches. Want of Marksmanship, he said, was the chief cause of the danger, because almost every soldier died.

To Attract Tourists

The modern bungalows and community houses, which are being constructed in Jasper National Park, Rocky Mountains, for tourists, will be completed and ready for occupation by June 15th. The camping season extends to September 15th.

Down the Lane

They walked down the lane together. The sky was covered with stars. They reached the gate in silence.

She held for him her bars.

She neither smiled nor thanked him.

Because she knew not how.

For he was just a farmer lad.

And she was a Jersey cow.

## Education

### And Labor

Valuable Service Rendered by Demonstrating What Known

Attention has already been called to the fact, that of a graduating class of the Ontario Agricultural College, only one hundred percent of the students, made their statement to their friends to go back to the farm. The other 88 seem to be convinced that they can make better use of their education than in the field of agriculture.

One of the 88 reversed his point of view in a letter to the Globe. His contention is that those who are trained in scientific agriculture and who have become fully acquainted with the needs of the country can render greater service to agriculture in other ways than by returning to actual farm work. "Such," he writes, "is the present position of the 88 and the 12 percent who have already secured agricultural positions, with their respective representatives, farm managers etc. Do you not think that these men are fulfilling a useful office and working hand-in-hand with the farmers? I am sure that the 88 are doing a valuable service to agriculture in other ways than by returning to the farm, but not on the farm, agriculturists more than ever." The point is, a man does not "shun the farm" when he has engaged in agriculture, but when he has not been able to make a success of it.

Perhapse at the present time the need of agriculture for guides and teachers is greater than the need for men who are agriculturists, but what of the future? An army without officers would not be of much account, but an army made up entirely of officers might be some use. In that case, if nothing else, what do we return to our country? Is not the lesson furnished by educated men demonstrating by the work of their own hands the value of their education would be a very important one.

## Editors and Doctors

Schoolboy Says College Makes Doctors But Editors Are Born

A schoolboy in a small town daily, editing a newspaper, was asked to write a composition on Professional Men.

When an editor makes a mistake there is a likelihood of a great deal of bad humor, but when a doctor makes one there is a funeral, cut flowers and perfect silence. A doctor can use a big word a yard long without him or anybody knowing what it means; but an editor can go to see another man's wife for charges for the visit, but if the editor goes he gets a charge of buckshot. When the doctor gets sick it is a case of the editor getting sick; when the editor gets heart trouble it is a case of too much books, and if he dies it is the Jim-Jams. Any old college can make a doctor; an editor has to be born."

The Press, Lethbridge, Alberta.

## Could Steer Well

Confidence of Motor Cyclist Did Not Ensure Safety

An enthusiastic motorcyclist, Miss Dorothy Bowles, of Hazelton, British Columbia, who was Lloyd George's private secretary, has a host of good motorcycling stories to his credit.

One of the best concerns a motorcyclist and his dog, which went to sleep in the snow, while the owner was away.

Making for speed, the headlights of an approaching car appeared in the distance.

"Sister, old man! See those lights?" exclaimed the occupant of the million seat.

Came the reply: "That's all right, old man—I can steer between them!"

Right the First Guess

"Here's my bill," said the surgeon. "Wish you would pay down \$100, and then \$55 per week."

"I'm not buying an automobile," said the patient.

"I am," said the surgeon.—Charles Town News and Courier.

Our idea of a great detective would be one who is smart enough to discover where a gas company reads a meter.

**Headache**

Recurring headaches usually come from an exhaustion of the nervous system, and they do not disappear until the vigor of the nerve cells is restored by such up-building treatment as Dr. Chase's Nerve Food.

Temporary relief by use of powders is often obtained at an enormous expense to the nervous system and the general health.

Get the nerves right and the headaches will not return.

Mrs. W. J. Pearce, Numa St., Cobourg, Ont., writes:

"My system became run-down and I suffered greatly with pain in my head. This was so severe that I would have to lie down for hours at a time. I could not get my work done. A friend advised the use of Dr. Chase's Nerve Food, which I took faithfully. I found quite an improvement in my condition. I continued using them until I had ideal health again. Dr. Chase's has strengthened and built up my system splendidly, completely relieving the pain in my head."

**Dr. Chase's Nerve Food, 50c; 1 lb. box, all dealers, or Edmundson, Bates & Co., Limited, Toronto.**

**A Combination Of Straw And Feathers**

A crown of straw, a brim of feathers, in loosely drawn strands, make up this charming little hat, which is sure to enhance the charms of the most beautiful girl. It is a decidedly stunning model and one that will find favor in the eyes of most women. The disk of straw which adorns the peak makes it distinctly Russian in mode.

**The Chief Danger**

"Are you going any further West?" "I planned to do so," said the foreign visitor. "Is there any danger from Indians?"

"Not if you keep out of the way of their motor cars."—Birmingham Age Herald.

**Ways of Measuring**

How Lloyd George Got Even With the Chairmen

A correspondent sends us the following little anecdote illustrating Lloyd George's ready wit.

One occasion when he was to address a meeting of English Workers, he was thinking to himself how to impress the speaker's expense, said in introducing him. "I heard so much about Mr. Lloyd George that I naturally expected to see a big man in every sense," he said, "so you can see, he is very small in stature."

Lloyd George arose. "I am grieved to find," he said, "that your chairman is disappointed in my size, but I assure you that I am a giant in every sense, a man." In North Wales we measure a man from his chin up, but you evidently measure him from his chin down."

After that the chairman made no more personal remarks.

**SATISFIED MOTHERS**

No other medicine gives the same satisfaction to mothers as to Baby's Own Tablets. They are equally good for children, who are equally well and are absolutely guaranteed to be free from opium or other harsh drugs. They are a safe, strong enough laxative and cannot possibly do harm—they always go down. Con. Read, N.D., writes—"I think that Baby's Own Tablets are a marvellous medicine. I have given them to my little girl with such good results that I now strongly recommend them to all mothers. Baby's Own Tablets are sold by medicine dealers in boxes of 25 at 25 cents a box. The Williams Medicine Co., Brockville, Ont.

Prince Sends More Stock

Horse Value At \$50,000 Sent to Royal Ranch in Alberta

Four pure race horse stallions and five mares have recently been shipped by the Prince of Wales from England to the Royal Ranch, Alberta, which he bought when he visited Canada in the summer of 1919. One of these stallions was purchased in England recently for \$50,000. Since the Royal Highness has been in Alberta, he has made several purchases of pure-bred stock from the Old Country. The last consignment of horses sent over in charge of a special staff from one of his English farms.

An Oil that is Famous.—Though it is not the birthplace of Dr. Max Knezevich, it is the home of that famous compound. From here its good name was spread to Central Europe, America, Australia and New Zealand. "This is far ahead enough to attest its popularity, for in these countries it is on sale and in demand."

Wishes Lloyd George Success

Failure Means War for Europe Says Gen. Smuts

Lieut.-Gen. Jan C. Smuts, Premier of the Union of South Africa, in a statement to the Cape Times on the subject of the General Conference said he hoped for victory for Lloyd George, for if all that resulted from the conference was the Russo-German treaty and the division of Europe into two armed camps, Europe would inevitably split, and "Greece would go to the side of the fatal alliance."

General Smuts said that if the faith

of France and Russia in military

prevails against the desire of Britain,

and Britain was beaten, then the

habitants of the slums of the great industrial centres. But the war saw

millions of vigorous men in the

British army and navy, and several

million others serving in the coal

mines, engineering works, roads

and other home work in the British Isles, and the idea that any large proportion of the adult male population

of Britain was effete was dispelled.

And Britain won the first of the latest university boat race, showing

two exceptionally powerful crews physically, one of them probably the fittest

which ever competed, the well-to-do class in England are still at the

height of stamina."

Unless Lloyd George could succeed

in modifying the militarist policy of

Poleaxe and Chitchatkin, disarmament

must disappear throughout Europe.

Amramagedon would become the

only goal of western civilization.

Nine-tenths of the tea imported to

the United Kingdom comes from India and Ceylon.

**German Money Makers**

Presses and Engravers Inadequate to Meet Demand

A terrible tragedy has transpired in the German Government's bureau of engraving and printing. Plates can be pressed fast enough to turn out thousand mark paper notes. German paper note printing presses have reached their physical limit and are unable to print money with greatly exceeds the supply.

Solving the dilemma, the German Government for the first time in the history of the mark has decided to issue 100,000,000 paper notes, which are much easier manufactured than the impressive 1,000 mark bills.

The new 1,000-mark notes will appear on the market in the course of the summer. Germany's largest bank, the Bank für Landwirtschaft und Handel, is worth at today's rate of exchange \$250, and the smallest paper note, that of 1 mark, is worth 3½ mills.

No surgical operation is necessary in removing corns if Holloway's Corn Remover is used.

**Alberta as a Seed Producer**

Where Oats and Other Cereals Reach State of Perfection

Alberta, the newest state, is saving the rest of Canada with seed oats this spring. It is equally significant that orders came from every other province in the Dominion. As a seed-growing state, Alberta's future is well started, but it began getting started right, and is already securing results.

Alberta oats stand in a class by themselves; no other part of the continent can produce the kind of oats that can grow in Alberta. The yield per acre is 100 bushels, or 20 bushels per acre. What is true of oats is true of other grains, and of grasses and vegetables. We may not grow here as wide a variety of crops as is possible in more temperate lands, but we can grow wheat, barley, rye, oats and other cereals, but what can be grown is grown to perfection.

More and more the older provinces and the states will recognize that they must come to Alberta for hard and white seed. Alberta's grain is the best that has been attained, and for the greater achievement in prospect, is due to the persistent and successful efforts which have been made by the faculty of agriculture at the University of Alberta, Alberta's Agricultural College. In seed-growing and to direct their operations in a way to build up a high reputation for their product. And the showing made in the year after year at the fair before, when Alberta exhibited, carried away a good many of the coveted awards at the International hay and grain show at Chicago, has not been without practical results. It pays to produce hard and white seed, and the world know that we have it.—Edmonton Bulletin.

**A Britons Decadent**

Idea Disseminated by Statistics of University Boat Crew

In the annual university boat race between Oxford and Cambridge which came off a month or so ago, the eight oarsmen in the Cambridge boat averaged 5 feet 10 inches in height and one hundred and seventy-eight and a half pounds in weight, as they stepped into the shell—which, out of tradition and in accordance with the rules of racing on 200 pounds, says the Ottawa Journal. Only one man in the crew was under six feet; two of them were respectively six feet five and six feet four and a half inches tall. The average age of the boat was 21 years, and the crew was 5 feet 10 inches in height and 172 pounds rowing weight. The gigantic Cambridge crew were as good in the boat as they were big; they won in very fast time, were first, and set a record which goes back now nearly a hundred years.

It was the fashion before the war to talk of the physical decadence of Englishmen, the test being afforded by the fact that the English were the shortest of the inhabitants of the great industrial centres. But the war saw

six millions of vigorous men in the British army and navy, and several million others serving in the coal

mines, engineering works, roads and other home work in the British Isles, and the idea that any large proportion of the adult male population

of Britain was effete was dispelled.

And Britain won the first of the latest

university boat race, showing

two exceptionally powerful crews physically, one of them probably the fittest

which ever competed, the well-to-do

class in England are still at the

height of stamina."

Unless Lloyd George could succeed

in modifying the militarist policy of

Poleaxe and Chitchatkin, disarmament

must disappear throughout Europe.

Amramagedon would become the

only goal of western civilization.

Nine-tenths of the tea imported to

the United Kingdom comes from India and Ceylon.

**Stops Bronchitis Quickly, Helps Irritable Throat, Ends Sneezing, Coughing**

Bell's comes at once when you are in the south vapors of Catarrhonia. Once its healing, pincy taste strikes the bronchial tubes, you realize that power of Bell's. Irritation can't live in the throat of a person inhaling Catarrhonia, so full of concentrated healing power. It removes the irritants, catarrhonia strengthens the weak throat, stops the cough, removes that chronic irritation, which causes colds, catarrh and winter ills, nothing can be better than the Bell's. Bell's is the standard size 25¢, all dealers or the Catarrhonia Co., Montreal.

**Soldier Settler in B.C.**  
A total of 2,738 soldier settlers have been placed on British Columbia farms since the war began, and have sold in the Lower Fraser Valley, a sum equivalent to that made by E. L. Ramsey, field supervisor for the Soldier Settlement Board at a meeting of agricultural officials here.

## GEORGE DISTRICT BUDGET

Read the article on "Watch for the Grasshoppers" on page one.

Virgil Neis was on the sick list for several days this week.

Miss Annie Albers is an extended visitor to Stettler, Alta.

Mrs. Alex. Bowby and family were visitors with Mrs. L. P. Minkler on Saturday evening.

A number of friends spent the weekend at the Jim Gads by home.

Mr. and Mrs. J. C. Simpson, Ross Simpson and Dan Clarke were visitors on Sunday last at the home of Mr. and Mrs. Alex Bowby.

Alf. Badoule motored north last Sunday and reports that the farmers in that part of the country are still busy sowing wheat.

Norman Ray is suffering from an attack of jaundice.

Mr. and Mrs. L. P. Minkler and family spent Sunday with Mr. and Mrs. Clarence Neis.

Miss Dora Holben and T. Trangen were Sunday visitors with Mr. and Mrs. Phillip Neis.

Mrs. Caswell Dunn is at present visiting with Mr. and Mrs. P. B. Crooks.

Mrs. P. B. Crooks and Mrs. Caswell Dunn spent Monday afternoon with Mrs. C. R. Brewster.

Mrs. T. Ferlin and family were visiting at the home of Mrs. G. W. Bichow last Sunday.

Little Nellie Neis, youngest daughter of Mr. and Mrs. Philip Neis, met with a painful accident last Sunday evening. Nellie and her sister were playing on the stump of a tree from which a tall fencepost had fallen. A bonfire bone. From latest reports Nellie is doing nicely and we hope will soon recover from the effects of her accident.

Mr. and Mrs. John Barker and family spent Sunday afternoon with Mr. and Mrs. L. S. Carter, Ripley district.

Mr. and Mrs. Emil Olson and family Sundayed with Mr. and Mrs. O. L. Davidson.

C. S. E. T.

The Trail Rangers met on Friday evening and conducted their best debate for the season, subject : "Resolved, that the printed word is of greater importance than the spoken word." The affirmative was upheld by Norman Ray and Jim Oldring and the negative by Hugh Smith and Claude Marshall. The debating was uncommonly good for the boys. The humours of the evening went to the negative.

The next meeting of the Rangers will be a social at the home of Mr. and Mrs. C. R. Brewster on Friday evening the 19th.

The Taxis boys met on Friday evening last at 8.15 in the hall of the Royal Canadian Legion, discussing among themselves, in debate on the following : "Resolved, that travel is a greater means of education than books." The affirmative was upheld by Harold Oldring, Leslie C. Marshall, the negative by Bert Cartenay and Harold Penberthum. The decision was close, but the humours went to the affirmative.

At the next meeting of the Trail Rangers on Friday next at 8.15 in the town hall, an address on "India" will be given by Rev. M. Peart.

Union Church  
Rev. J. E. Collins, Pastor11 a.m., Sunday School.  
7.30 p.m., Evening Worship.  
Pastor's discourse will be based on the "Healing of the Man with the Withered Hand."Five minutes' talk to boys and girls.  
All are invited.

High compliment for a shipment of Alberta butter recently forwarded by the dairy company to produce houses in Vancouver, who have received by Mr. Marker.

## Cartoads Bite The Dust

The much discussed baseball game between the "Montana Dodgers" and the "Cartoads" was played before an appreciative crowd at the school diamond last Tuesday evening and resulted in the Cartoads, having had the last gasp, in the close score of 7 to 6. Up to the eighth frame the Cartoads occupied the leading position by a score of 6 to 5, but the Dodger's came from behind and tallied up three counters to win out. The Dodgers were under the management of Geo. Jackson, and John Annesley attended as manager for the Cartoads. Manager Annesley thinks that it was only by a slip of the lip that they lost the game on Tuesday and is convinced that a pair package of ball-tossers can reverse the score. Manager Jackson is just as certain that the victorious Dodgers can repeat the deed, and perhaps add something to it, and that the Cartoads will again in two weeks, on May 30. To settle any doubt as to the superiority of the teams, there will be series of best three games out of five, the official score sheet being arraigned after the exhibition given on Tuesday, several big league scouts are expected to be on hand to give the players the proper rating. The teams :  
Dodgers—7 to Cartoads—6Huenam p. J. McLeod

Mr. Blockhouse, Umpire.

Dodgers—2 0 2 0 0 0 3 x—7  
Cartoads—1 5 0 0 0 0 0 0—6

There seems to have been some dissatisfaction expressed over the taking of a collection at the game, it having been announced that no admission would be charged. Managers Jackson and Annesley wish to state that the admission to the game was arranged, and that the suggestion of taking a collection was made later by the Mirror Athletic Club for the benefit of the organization. The money raised over the game was handed over to the M.A.C. In future no collection or admission will be charged—the game will be absolutely free.
